Iris Garden Guide

1938

IRIS CITY GARDENS

BRENTWOOD, TENNESSEE

Near

NASHVILLE

The Iris City of the World

INFORMATION

As this list is used principally by visitors in our gardens during the blooming season, we have given only brief color descriptions. Fuller information on any of the varieties will be furnished gladly.

All varieties are guaranteed true to name. We use every precaution to assure correctness. If any error occurs full adjustment will be made.

The west garden, one acre square, contains the introductions of others; this is planned for convenient judging and inspection and many of the new irises are added each year. Both gardens east of the main walk contain only irises developed by us, many of them seedlings blooming this year for the first time. The garden plan is by Mrs. Williams.

TERMS—Payment is expected when irises are delivered. This will be within a few weeks after the blooming season. We recommend early Summer planting. Deliveries will be made without charge in the vicinity of Nashville. Out of town orders will be sent by prepaid express if amounting to \$5.00. A certificate of Inspection accompanies each order.

LOCATION of gardens: From Nashville, drive eight miles south on the Franklin Road (31). When you come to the highway sign pointing left toward Hill Road, turn here over the concrete railroad bridge; follow this road about five hundred yards to Hill Road; turn left and the gardens are the second entrance on the left hand side.

IRIS CITY GARDENS

THOS. A. WILLIAMS

Ultra—Rich blue purple bicolor.....	.25
White Autumn King—Large reliable pure white.....	2.00

BULBOUS IRISES

Each year we grow thousands of these beautiful Dutch, Spanish, English and Tingitana hybrid irises. They always attract a great deal of favorable comment and almost everyone wants them. They are easy to grow, perfectly hardy and make the very finest of cut flowers.

They are priced by the dozen bulbs and we deliver only the top size bulbs that will bloom the first year. All bulbs are twice treated with Semesan, assuring healthy growth and large blooms.

Prices vary from .75 to 1.50 per dozen bulbs.

Complete listing in Fall Catalog of Eason-Morgan, with tulips, hyacinths, narcissus, etc.

Each year, among the seedlings that we grow, there are many fine irises in the full color range that are not sufficiently different from the many already in commerce to name or introduce. These are ideal for planting where quantities of good irises are wanted but where named varieties are too expensive. These we sell after the blooming season each year at the following prices:

25 Divisions, well mixed.....	\$ 1.00
100 Divisions, well mixed.....	3.00
1000 Divisions, well mixed.....	18.00

These seedlings may be ordered at the gardens or at the store of Eason-Morgan. Shipping charges on these are not prepaid.

Visitors to the garden may see in bloom many of the new table and bedding irises grown and registered by Mr. C. E. F. Gersdorff, registrar of the American Iris Society. Some of these already have been introduced and others are being tested, observed and rated this year. Each is plainly marked with the name and (Gersdorff)—Those proving worthy will be listed in 1939.

We also grow many other varieties of irises not listed here. These include Dwarfs, Reticulatas, Persica, Siberian, Japanese, Louisiana natives and their hybrids, the famous Washington hybrids, Spurias and many other natives from all parts of the world. If interested in these we will gladly give full information.

At other seasons we have extensive plantings of Narcissus, Tulips, Hyacinths, Gladiolus, Peonies, Hardy Chrysanthemums and many summer blooming perennials. You are invited to visit the gardens during any of the blooming seasons.
